Calculation policy

Updated September 2024

Guidance for teachers

The calculation policy is divided into four sections: addition, subtraction, multiplication and division. At the start of each section, you will find an overview of the progression of skills. Calculations involving decimal numbers and fractions are included.

The calculation policy follows the same concrete, pictorial, abstract approach as our main schemes of learning. Where appropriate, sentence stems and key questions are included alongside the key representations.

Where skills are divided into more than one section across the page, there is a progression in the level of difficulty from left to right.

For example, when adding across a 10, children need to be able to add across 10 itself, before making links with related facts.

<p>Add across a 10</p> <p>Partition the number you are adding to make a full ten.</p>	<p>... can be partitioned into ... and ...</p> 	<p>I add ... to get to ... then I add ...</p> <p>$8 + 5 = 13$ $28 + 5 = 33$</p>

<p>Year 6</p>	<ul style="list-style-type: none"> Perform mental calculations, including with mixed operations and large numbers. Divide numbers up to 4 digits by a two-digit whole number using the formal written method of short division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context. Divide numbers by 10, 100 and 1,000 giving answers up to three decimal places. Use written division methods in cases where the answer has up to two decimal places. Associate a fraction with division and calculate decimal fraction equivalents. Divide proper fractions by whole numbers [for example, $1/3 \div 2 = 1/6$] Solve problems involving the calculation of percentages.
<p>Progression of skills</p>	<p>Key representations</p>
<p>Short division</p> <p>Encourage children to interpret remainders in context, for example knowing that “4 remainder 1” could mean 4 complete boxes with 1 left over so 5 boxes will be needed.</p>	<p>There are ... groups of ... hundreds/tens/ones/ in ...
