In 1666, a huge fire that started in a tiny bakery burned down most of London - because it was so big, it was called the <i>Great Fire of London</i> .	
The fire lasted four days and burned down over 13,000 homes. There are a lot of reasons why the fire was so large, mostly to do with the way houses were built - a lot of them were made from wood (which is flammable) and were built very close together.
